

EMC NetWorker Common Commands Reference

For Daily Backup Operations & Troubleshooting

Start NetWorker services (Linux):

```
systemctl start networker
```

Stop NetWorker services (Linux):

```
systemctl stop networker
```

Restart NetWorker services (Linux):

```
systemctl restart networker
```

Check service status:

```
systemctl status networker
```

View running NetWorker processes:

```
ps -ef | grep nsr
```

List configured clients:

```
mminfo -r client
```

List all backup groups:

```
mminfo -r group
```

Check media database info:

```
mminfo -av
```

Check backup status summary:

```
mminfo -r client,group,level,totalsize,savetime
```

Manually start a backup group:

```
savegrp -G Daily_Full
```

Preview group before running:

```
savegrp -p -G Daily_Full
```

Check daemon logs:

```
tail -f /nsr/logs/daemon.raw
```

Check savegroup logs:

```
tail -f /nsr/logs/daemon.log
```

Stop a running backup group:

```
savegrp -x Daily_Full
```

List available devices:

```
nsradmin -p nsrexec -c 'show name;print type:NSR device'
```

Mount a media manually:

```
nsrmm -m
```

Show licenses info:

```
nsrlic -v
```

Check NetWorker version:

```
nsradmin -p nsrexec -c 'show version;print type:NSR'
```

Restart NetWorker services (Windows):

```
net stop nsrexecd && net start nsrexecd
```

Check NetWorker service status (Windows):

```
sc query nsrexecd
```
